 Find	10. I think there are a great deal of extraordinary local experts in areas/issues that parents/community would learn a great deal from. These could be explored more fully. ie Experts at NTHS, our business community, who have achieved extrordinary success in area related to students, HS, and parents. Occasionally, just an entertaining, issue should be presented to just draw interest of new audience(s) to FAN. FAN provides an excellent, needed, service to the NT community. Parents of our HS students, need & want connection to other parents, and the schools. I think there alot out there, who are not involved, who want to be involved in their childrens future through the comminity/HS/parent networks, or events.	Thu, 5/17/07 10:19 PM
